6 Professional Development Hours

PD Content Area: *Special Education*

This workshop will focus on classroom interventions for students with anxiety-related and oppositional behaviors. Rather than responding with punishment and reward-based consequences, participants will gain an understanding of the students' challenges and learn strategies for teaching them how to cope. These interventions and strategies will allow students to improve their behavior by acquiring the necessary skills to make academic and behavioral progress. Case studies will be used to give participants the skills and information they need to assist in the creation of effective behavior plans.

### **The workshop will enable participants to:**

- Describe why traditional behavior plans of reward and consequences often do not work for students with challenges such as anxiety-related and oppositional behavior.
- Learn how to identify anxiety in a student and understand how anxiety effects learning and behavior.
- Be able to create an effective behavior intervention plan for students with anxiety-related or oppositional behavior.
